

COVID-19 Supplementary risk assessment during reduced occupancy

This risk assessment document is a supplement to your existing setting risk assessment to reflect changes you are able to make as a result of reduced occupancy during periods of national lockdown. All of the control measures in your existing risk assessment and as outlined in the Compliance Code for Educational Settings remain valid. As with your substantive risk assessment, this assessment considers a single hazard of COVID-19 and identifies the control measures that are in place for the setting to reduce the risk of transmission to staff, pupils and visitors, as low as is possible in line with community risk levels. The template provides suggestions on areas you may be able to change, settings should outline the measures they have implemented. The measures possible will vary depending on the number of pupils, staff and space in the setting.
